

All plates to all men (or women*)

Film printing comes of age

As a Number Plate supplier, are your customers happy with basic, black only prints on Standard Oblong plates? If so, then you'll benefit from our **Prime Series** thermal printer range, which produce traditional, road legal plates quickly and cost efficiently.

However, if your demand is more varied and you find yourself having to turn away business for other plate sizes and colour printing, then our **Scope Series** is the answer you're looking for. Printing on film for application onto reflective faced plastic substrate means you can produce plates of any legal size, including side badges, colour bottom lines and borders. (You can even use our Scope Series printers to produce signs using our optional LG Signs software.)

Working with **OKI** - our print solutions partner - Tennants have invested to increase the range of printed film options even further and can now provide a full pre-printed media service, with badges, dealer bottom lines, borders and unlimited branding for lipped plates, all in stunning HD, so all you have to do is type in the registration and press go!

* You see? Offering a range of systems to suit **ALL** number plate suppliers isn't the only way in which we're inclusive ...

Money for nothing, and the lips are free!

Advertise your brand by choosing lipped plates and take advantage of our limited time offer:

Lipped film for the price of pre-printed Standard Oblong

Have a side badge, colour dealer name on your bottom line, border, lip branding - or all of the above - at **NO EXTRA COST** compared to pre-printed Standard Oblong.
