

ENVIRO-PLATE IS MADE FROM 90% RECYCLED PLASTIC

Introducing **Enviro-Plate**, our eco-friendly and cost-effective number plate. Utilising recycled ABS cuts its carbon footprint by 83% to 0.5 CO₂e per kg, compared to 1.9 for recycled Aluminium. In addition, using film provides substantial expenditure savings, costing 84% less than reflective. Making **Enviro-Plate** a great, environmentally friendly solution.

- RECYCLED ABS
- REFLECTIVE FACE
- PRINTED FILM

ENVIRO-PLATE :

Printed Film laminated to a 90% Recycled ABS Plate with a Retroreflective Face.

ABS FOOTPRINT

Recycled ABS carbon footprint is 0.5kg CO₂e per rABS

ABS BACKING

90% recycled plastic made in the UK

COST-EFFICIENT

Film reduces annual number plate expenditure by 25%

ENVIRO-PLATE: ECO-FRIENDLY & EFFICIENT

ENVIRO-PLATE

Our ABS Plate: 90% recycled, 10% virgin ABS.

CARBON FOOTPRINT

Composite: 0.8kg CO2e/kg ABS.

Note: Chart displays CO2 equivalent emissions per kg of substrate.

PRINTED FILM

Enviro-Plate: Tennants clear film is a combination of performance & cost.

ABS BACKING

Our 0.2mm Polyester Film with exceptional optical clarity. Durable with high tensile strength, it has an ink receptive coating.

COST-EFFECTIVE

Film is a highly cost-effective media, that's just 16% the price of reflective panels. So, it slashes the cost of any printing errors.

COMPETITIVE

Enviro-Plate reduces annual number plate expenditure by 25% compared to others, according to a prominent procurement platform.

REFLECTIVE FACE

Enviro-Plate: Utilises Oralite Reflective for standards compliance.

COMPLIANT

Oralite Reflective is made under multiple ISO systems, ensuring compliance with BSAU 145e.

ECO SAFE FILMS

Oralite Reflective does not contain Microplastics, any polymers are contained.

CUTTING EDGE

Orafol's manufacturing reduces emissions, improves air-quality, and captures heat for reuse.

NEW LEASE OF LIFE... FREECYCLE

OUR MISSION

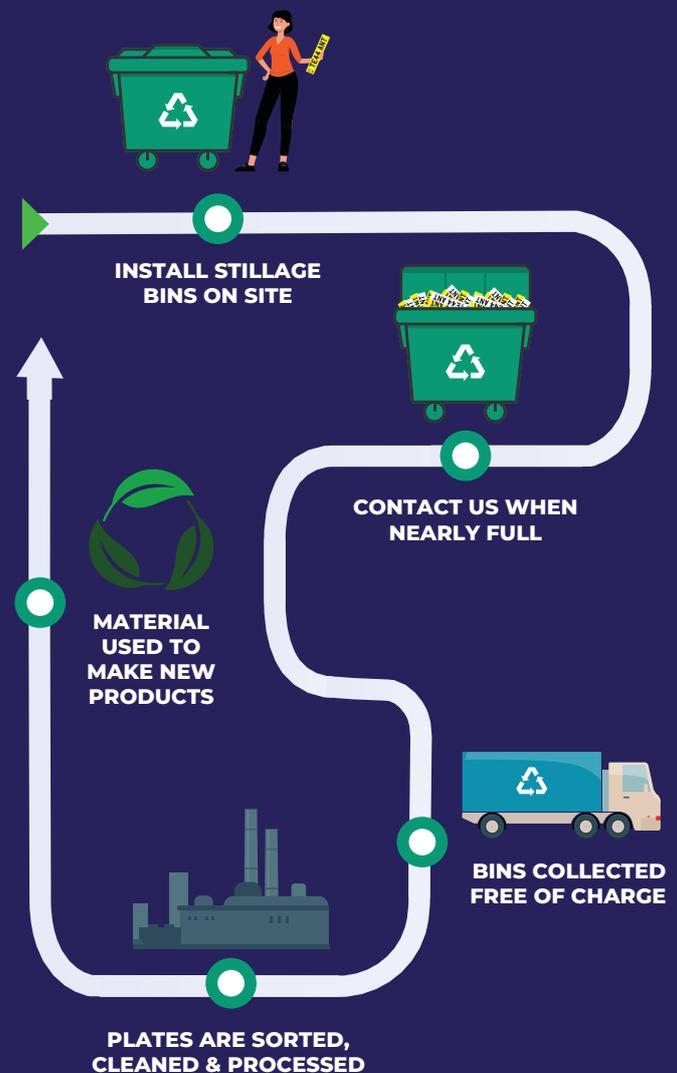

- Innovative recycling service complements eco-friendly number plate components
- Enviro-Plate backings are 90% reclaimed plastic & recyclable
- Oralite Reflective produced in low-emission factory in Germany
- Using our products reduces waste sent to landfill
- Invest in our closed-loop sustainability approach for a greener environment

THE PROCESS

- Waste number plates are collected & processed.
- Clear Acrylic is turned into flakes/pellets
- **Enviro-Plate** & Plastics are reused for number plates.
- Metal plates & retroreflective layers are melted down into metal ingots.

FREECYCLE

- First dealership number plate recycling service.
- Promote sustainability and reduce environmental impact.
- Leaders advocate higher recycling quotas.
- Service streamlines number plate recycling.

Save more of your workshop & pre-sales teams time by signing up to Tennants Number Plates recycling service. This service is Completely **FREE** and is included as part of the solution we offer to eligible Dealerships
